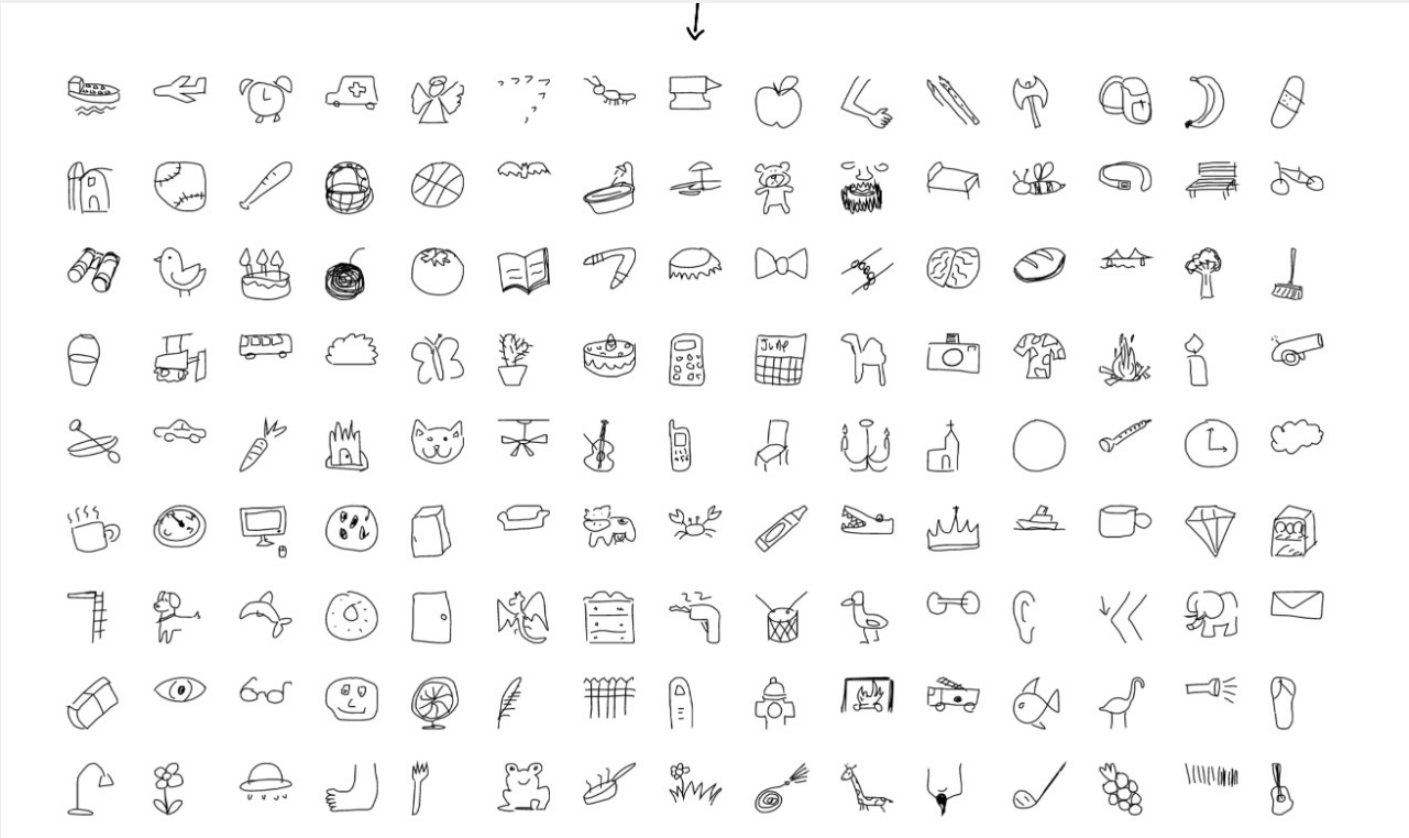
Introduction to Project

Google Quick Draw, is a drawing game that is training the neural network to recognize the Doodled images, messy images, or the images that are not able to understand using Deep Learning alng with Data Science.

Approach

- Convolutional Neural Network
- Python
- Tensorflow

Data Set



The above Dataset is a collection of 50 million drawings but at first we are working on 10 drawings.

Work flow

Week plan

- Day 1 -
- Day 2 - Data Scrapping
- Day 3 - Data modelling
- Day 4 - Data Preprocessing
- Day 5 - Data visualization

THANK YOU!!
